REASONS FOR ALLOWANCE

Claims 26 and 28-49 are allowed. The allowability of claims 44 and 45 was addressed in a previous Office action filed 3/7/05

The following is an examiner's statement of reasons for allowance:

Regarding claims 26, 28-43, and 46-49, the prior art of record fails to teach or fairly suggest an apparatus for computerized breath analysis comprising a corrector unit connected to the breath analyzer and operative to provide an indication of the arterial carbon dioxide partial pressure of the subject based on the discrepancy between the end tidal carbon dioxide partial pressure in the breath of the subject and the arterial carbon dioxide partial pressure of the subject, in combination with all of the other limitations of the claims. Holte teaches an apparatus comprising a breath receiver and breath analyzer as claimed by claim 26 of the instant application but lacks a corrector unit connected to the breath analyzer and operative to provide an indication of the arterial carbon dioxide partial pressure of the subject based on the discrepancy between the end tidal carbon dioxide partial pressure and the arterial carbon dioxide partial pressure of the subject. Instead, in the apparatus of Holte, the discrepancy between the end tidal carbon dioxide partial pressure and the arterial carbon dioxide partial pressure is used to determine whether to use the end tidal or arterial carbon dioxide value as the indication of systemic blood carbon dioxide partial pressure value for determining the carbon dioxide gap (col. 6, lines 15-31 of Holte).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
